

## CONTINENTAL 416 JOY

INCLUDED

OPTIONAL

The **CONTINENTAL 416** is a highly productive firewood processor. Thanks to the 400 mm cutting capacity of the powerful hydraulic chainsaw and the splitting power of 16 tons, this combi-cutter can work on even hard and knotty wood. The operator controls are hydraulic and the hydraulic splitting wedge made of DOMEX® material allows you to split your logs by centring them in the best possible way, avoiding waste or asymmetrical splitting. There are 3 splitting wedges supplied (2/4 - 6 - 8). The Continental 416 is equipped with an oversized tank, a radiator for cooling, several compartments for storing tools or the oil tank. The Continental 416 is also equipped with a hydraulic 3-stage conveyor belt and hydraulic attachments for the log deck.
