

MULTICUT

MULTICUT is the automatic multi-blade saw from Balfor. Thanks to its triple-blade system and the possibility to set the cut to any size, **MULTICUT** is the automatic saw with an unprecedented hourly output. The sawdust is evacuated thanks to a high-performance fan, which allows the operator to work in maximum comfort. The sawing lengths are multiple, 25, 30, 33, 40 and 50 cm and are easily adjustable thanks to two handles on the rear. High productivity and reliability are the main features of this machine. The loading star rotates continuously and all the operator has to do, is load.

MULTICUT will take care of the rest!
