PRO 50 OR 1280 C

Version with winch

## CA radio\*\*

Version with remote controlled winch

PRO 50 OR 1280 CA

### PARTNERS

The horizontal log splitters of the **PRO series** are robust log splitters, built with the best equipment and very efficient. Thanks to the hydraulic loading, the AUTOLOAD versions are able to position the logs while splitting and thanks to the hydraulic wedge, the operator can split the log with extreme precision. The bench behind the wedge allows the operator to pick up the split log to split it again, this operation is made easy thanks to the sinuous design of the supporting frame. The entire frame as well as the hydraulic wedge are made of DOMEX non-deformable steel, a guarantee of quality and maximum durability. The LOAD versions are equipped with rear lights, large trailer wheels and detachable drawbar.
