**BALFOR** 

## SAMURAI EXPERT AUTOMATIC

The **SAMURAI 700** is the sawing machine that can easily cut all types of timber, logs or bundles of branches. Thanks to its innovative system, the **SAMURAI 700** allows you to work without pushing the full weight of the benche and log. It is a sawing machine very practical, fast and above all safe. Thanks to top-quality components such as the Widia blade, the rollers on the table for advancing the log and the fully hydraulic drive for the PTO shaft version, the **SAMURAI 700** is a sawing machine of a higher standard than any other. The version **SAMURAI 700 EXPERT** was designed to increase the sawing machine's usability to the highest level. **SAMURAI 700 EXPERT AUTOMATIC** is Balfor's automatic sawing machine, simple, fast and super productive. Boasting a maximum productivity per hour the **SAMURAI 700 EXPERT AUTOMATIC** allows you to work on roundwood or split wood. The operator only has to worry about loading the wood to be cut, and the machine does it all. The cutting length is adjustable from 25 to 60 cm every 5 cm and the 700 mm blade is capable of cutting up to 25 cm in diameter. Thanks to the fully hydraulic drive in all PTO shaft versions, maintenance is reduced to a minimum.
