

SHARK 700 C

SHARK 700 EM

SHARK 708

DI 600 EM

SHARK saws are the result of painstaking research and decades of experience in the manufacture of professional saws. In fact, SHARK is the only sawing machine having a blade of 700mm that can cut logs over 30 cm in diameter and is the only one that can guarantee visibility for the operator. SHARK allows safe working without obstructing the view of the cutting operation. All other circular saws in fact have a metal sheet that covers the log and the blade and prevents the operator's visibility. Saw holder, adjustable rear blade guides, WIDIA blade, 3-belt drive (not 220V), vacuum predisposition, emergency brake, double wood blocking handle mounted on bearings are just some of the features that make SHARK a superior product. Shark, like all Balfor products, complies with the latest safety standards in force.
