

SL RANGE

The SL Range Mulcher fit excavators from **0.8 to 4.0 tons**.

Suitable for grass and shrub reclamation work, even in tight spaces, the **SL Range** has a compact and robust design making this mulcher versatile for both amateurs and professional jobs. Thanks to the integrated multifunction valve block, the mulcher does not require a drainage pipe up to 10 BAR maximum counter-pressure.

STANDARD TECHNICAL FEATURES

- Compact and robust design
- Frame with double cavity bottom, reinforced up to the point of connection with the front chains for greater impact resistance
- Spherical roller bearings better protected from impurities thanks to a labyrinth of special seals.
- Shaft with blades or hammers with fixed supports for a better shredding of the materials.
- Spiral-mounted tools for a better cutting performance
- Direct Transmission
- Flow control valve - shock proof valve – anti-cavitation valve – max pressure (it does not require drainage pipe)
- The shaft can be equipped with hammers or Y-shaped blades
- Internal toothed bars that help to chop the material
- Rear blade in rubberized, multi-layered, and tear-proof canvas
- Support roller with through shaft for greater resistance
- Protection devices in compliance to current European Regulation according to CE norms
- Bolted steel plate to arrange the machine coupler
- High quality painting for greater resistance to impacts and wear
