

# SM RANGE

The Mulcher SM Range fit excavators from **3.5 to 8.0 tons**.

Suitable for reclamation jobs on grass and shrubs even in tight spaces, the SM Range has a compact and robust design making this mulcher versatile for different fields of activity such as Constructions and maintenance of green areas (Public and Private). Thanks to the integrated multifunction valve block, the mulcher does not require a drainage pipe up to 10 BAR maximum counter-pressure.

## STANDARD TECHNICAL FEATURES

- Compact and robust design
- Frame with double cavity bottom, reinforced up to the point of connection with the front chains for greater impact resistance
- Spherical roller bearings better protected from impurities thanks to a labyrinth of special seals.
- Shaft with blades or hammers with fixed supports for a better shredding of the materials.
- Spiral-mounted tools for a better cutting performance
- Direct Transmission
- Flow control valve - shock proof valve – anti-cavitation valve – max pressure (it does not require drainage pipe)
- The shaft can be equipped with hammers or Y-shaped blades
- Internal toothed bars that help to chop the material
- Rear blade in rubberized, multi-layered, and tear-proof canvas
- Support roller with through shaft for greater resistance
- Wear-resistant and replaceable skids
- Protection devices in compliance to current European Regulation according to CE norms
- Bolted steel plate to arrange the machine coupler
- High quality painting for greater resistance to impacts and wear
